

HawkEye 6200

Blue Sky Network 

Autonomous Maritime Tracking System

The ability to seamlessly track any vessel around the globe using satellite data in real-time is an essential part of safety, operations, monitoring and patrol initiatives for any maritime organization.

The HawkEye 6200 offers the best-in-class autonomous tracking and monitoring solution for maritime-based operations. It is built to support dual-mode Iridium satellite and GSM/cellular connectivity, along with external power source and internal battery. It transmits real-time tracking data for analysis through the SkyRouter platform, which is available in the cloud along with iOS and Android devices.

For over 15 years since 2001, Blue Sky Network has proudly assisted clients achieve the highest safety, cost saving and operational efficiency by managing and tracking their marine vessel fleet around in the world.

Feature-Packed

Automatic Event Triggers

The device can send automatic event alerts based on vessel power on/off, back-up battery status, hardware tampering, server-side geofences, and activation of the Quick Position (QPOS) button, etc.

Easy Installation

The HawkEye 6200 can be easily installed or mounted to any vessel using either the supplied stainless steel mounting hardware or optional magnets for multiple configuration options.

Marine Specific Ingress Protection

The device is UV, salt water, dust resistant with an IP 67 - IP 68 rating, and designed specifically for use in even the harshest marine environments.

Truly Global Coverage

The Iridium global network of 66 low-earth orbiting (LEO) satellites offers the lowest latency and a true global coverage in comparison with any other satellite constellation.

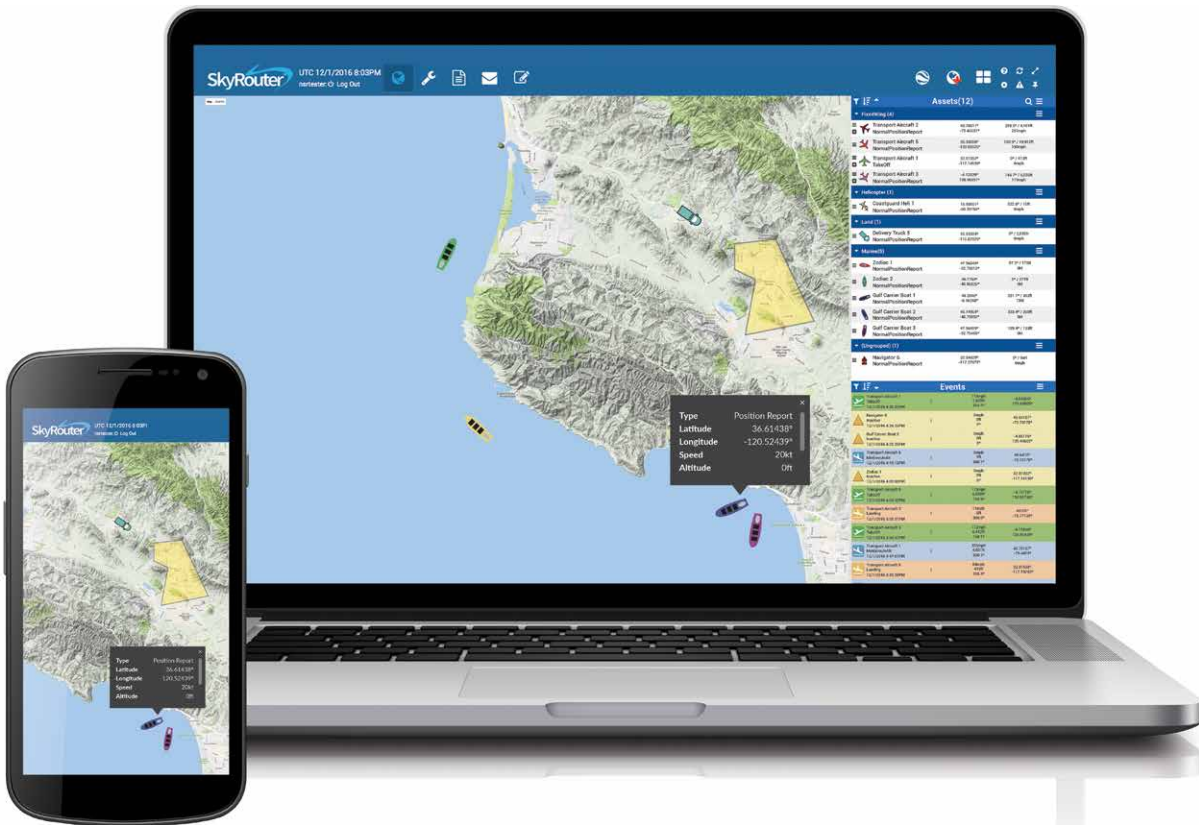

No Roaming Costs

Because there is only one communication provider for global coverage, there are no roaming fees.

Always On

The device is built to be tamper-proof and constantly running, and will automatically turn on and start tracking your vessel as soon as power is applied to it. An optional battery backup can be provided, meaning your vessel is tracked even during extended voyages.

Key Features of HawkEye 6200 + SkyRouter

Completely Secure

Hosted on fully redundant servers controlled by secure service gateway (SSG devices).

Server-Side Geofencing

Create and customize device geofences remotely through the SkyRouter app.

Remotely Update Settings

Update device reporting settings, emergency mode features and backup battery reporting settings remotely via the SkyRouter platform.

Dynamic Reporting

Define and customize automatic event triggers, reporting intervals, device usage and invoice data reporting.

Remotely Accessible

SkyRouter is touch screen friendly on any Android or iOS device. *A high-speed internet connection is recommended.

Enhanced Map Management

Comprehensive map overlays, and real-time single and multi-screen views.
